

MultiSafe-MX

Large range of I/O
Repeater panel
Customer specific interface

Addressable modules and software

The MultiSafe-MX offers a large choice of configurations and suits the requirements of many industrial sites.

Flexibility

The MultiSafe-MX interfaces with devices using either conventional and/or addressable module inputs and outputs. These modules are used to tailor the system to customer requirements.

Safety

The MultiSafe-MX panel can be used to produce SIL2 and SIL3 compliant systems.

Features

Large choice of cards and modules

Redundant CPU

Dependable power supplies

Interface conforms to standards

Cards interconnected on redundant bus

Benefits

Flexible configurations (conventional, addressable, bus)

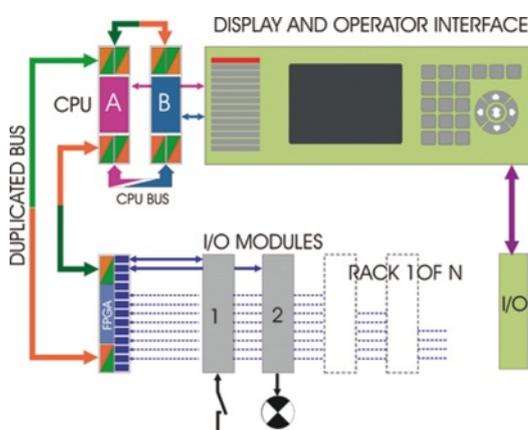

SIL2 or SIL3 safety level

Conformity to EN 54-4

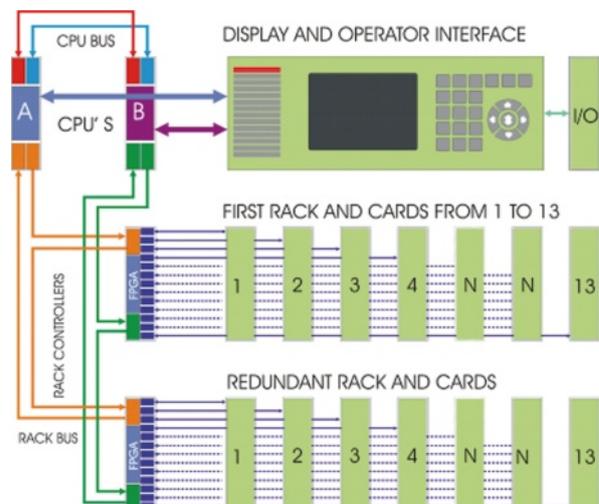

Conformity to EN 54-2

Improved system reliability and availability

CONFIGURATION SIL2

CONFIGURATION SIL3

Addressable modules SSP BUS (gas detection, manual alarms, commands)

MOD-AI020 - ADDRESSABLE MODULE FOR ANALOGUE INPUT CONTROL
4-20 mA analogue input with 24V CC 500mA output for detector power supply

MOD-AV010 - ADDRESSABLE MODULE FOR ANALOGUE INPUT CONTROL
0-10 V dc analogue input with 24V CC 500mA for detector power supply

MOD-DI - 8 INPUT ADDRESSABLE MODULE
Up to 8 non-monitored digital inputs
Used on an SSP-type BUS for the supervision of voltage-free contacts

MOD-AIT - ADDRESSABLE MODULE FOR INTRUDER ALARM CONTROL
Module conforms to CEI 79-2
Receives signals from intruder detectors
4 x 12 V dc passive or active devices

MOD-DO - ADDRESSABLE CONTROL MODULE OF 8 OPEN COLLECTOR OUTPUTS
Controls up to 8 non-monitored open collector outputs
Suitable for loads up to 300 mA per output, on an SSP-type bus

MOD-DISP - LOCAL DISPLAY
255 configurable messages
Warning LEDs (alarms and faults)
Buzzer with acknowledge key

Supervision IRIDE

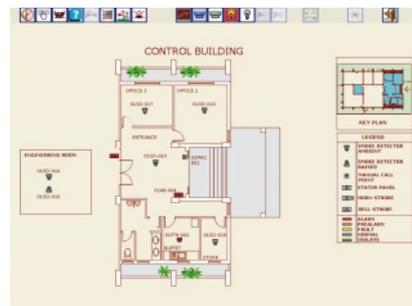

IRIDE
Supervision software enables site specific software

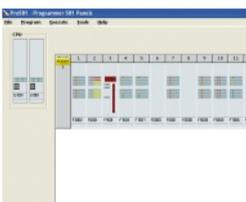

IRIDE VIDEO
Supervision software allows video and graphical animations on a site-wide interface

EXAMPLE OF APPLICATION

Detectors location visualised
Client specific interface

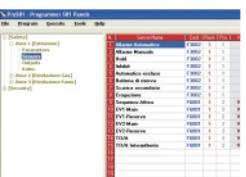

Configuration tool PRO-MSMX

PRO-MSMX
Control panel configuration software

- Configuration of detectors
- Configuration of I/O modules
- Configuration of the panel logic functions

The software allows easy configuration of all detectors

- Type
- Range
- Alarm threshold
- etc....

EXAMPLE OF CONFIGURATION SCREEN

User friendly interface
Archive and recovery functions

Code	Parameter Name	Unit	Value	Min	Max
